ALL TO-GET-THERE

Advanced Phonetic English Skills for Research Communication

Global Connect

Foundations of English Phonetics for Academic Research

- Introduction to key phonetic features of English
- Use of the “**I sound English™**” method
- Common pronunciation challenges for non-native researchers
- Importance of phonetic accuracy in academic communication

Pronunciation Strategies for Scientific Terminology

- Phonetic training focused on medical and research-specific vocabulary
- Stress, intonation, and rhythm patterns in technical English
- Articulating complex terms clearly and confidently

Enhancing Public Speaking Skills through Phonetics

- Use of techniques through practical exercises: mini-presentations with feedback
- Voice modulation and pronunciation for oral presentation

Practical Workshops and Applied Phonetic Labs

- Simulation of poster sessions and conference talks
- Recording and analysis of individual speech patterns
- One-to-one coaching for pronunciation refinement

Cross-cultural Communication and Networking in Research

- Phonetic awareness in global English settings
- Overcoming communication barriers in international collaboration
- Group activities: networking roleplays and collaborative tasks

Final Assessment

- Oral presentation of a research abstract
- Phonetic accuracy, clarity, and communicative effectiveness evaluated
- Certificate of Completion awarded

Programme Highlights

- Tailored for medical and scientific research environments
- Interactive, practice-based learning model
- Led by specialists in English phonetics and research communication
- Focused on building confidence and competence in global academic forums
