

# Curriculum Vitae - Dr. Fabio Verginelli, PhD

May 12, 2020

## Personal data

**Name:** Fabio Verginelli

**Place and date of birth:** Rome, February, 18, 1970

**Citizenship:** Italian

**Work address:** University "G. d'Annunzio" of Chieti-Pescara, Via dei Vestini, 31 66100 Chieti, Italy

**Affiliation 1:** Department of Pharmacy, "G. d'Annunzio" University - Chieti-Pescara, 66100 Chieti, Italy

**Affiliation 2:** Center for Advanced Studies (CAST), "G. d'Annunzio" University of Chieti-Pescara, 66100 Chieti, Italy

**Phone Number:** +39 0871 3554576

**Email:** fabio.verginelli@unich.it

**Orcid Id:** <http://orcid.org/0000-0002-8636-2517>

## Education and qualifications

**1994-1996** - Undergraduate internship at Department of Oncology and Neuroscience - Section of Molecular Pathology, "Gabriele D'Annunzio" University - Chieti

**1996** - Graduation in Biological Sciences "cum laude" at University "La Sapienza" of Rome

**1999** - Qualification for Professional Practicing in Biological Sciences

**1996-2000** - PhD student in Paleopathology (Ancient DNA studies)

**2001** - PhD in Paleopathology at Catholic University "A. Gemelli" of Rome

## Employments and Academic Ranks

**October 1996 - July 1997** - Research contract conferred from the Archaeological Superintendence of Rome - Ministry for Cultural and Environmental Heritage focused on "Paleogenetic analysis of anthropological remains (50 individuals) from the Vallerano necropolis"

**January 1999 - October 1999** - Research contract conferred from the Archaeological Superintendence of Rome - Ministry for Cultural and Environmental Heritage focused on "Paleogenetic analysis of 26 ancient skeletal remains from the necropolises discovered along the route of the High Speed Railway (T.A.V.)"

**2001** - Research contract, Department of Human and Animal Biology, University "La Sapienza" of Rome focused on "analysis of human mitochondrial sequences from Asian and sub-Saharan populations"

**2002-2004** - Research contract conferred from the Department of Oncology and Neurosciences, University "G. d'Annunzio", Chieti, focused "on the study of molecular physiopathology of hereditary gastrointestinal and breast cancer"

**2005-present** - University Staff Researcher, General Pathology, University G. d'Annunzio Chieti-Pescara, Department of Pharmacy

## Teaching activity and related institutional responsibilities

**2005-present** - Teacher of General Pathology for the Course of Pharmaceutical Chemistry and Technology, University G. d'Annunzio Chieti-Pescara

**2007** - Invited lecturer at "Molecular diagnostics: basic principles and applications" course accredited by the Ministry of Health (ECM, 12 credits) directed to Biomedical Laboratory Technicians. Department of Laboratory Medicine and Advanced Biotechnology, IRCCS San Raffaele - Pisana, Rome

**2005-present** - Member of a graduation thesis Defence Committee for the Course of Pharmaceutical Chemistry and Technology, University G. d'Annunzio Chieti-Pescara;

**2005-present** - Member of a graduation thesis Defence Committee for the Course of Pharmacy, University G. d'Annunzio Chieti-Pescara

**2005-2011** - Committee member for the PhD student track in "Oncology and Molecular Pathology" (XXI, XXII and XXIII cycles), Scuola Superiore di Dottorato, G. d'Annunzio University, Chieti, Italy

**2007** - Member of the Committee for PhD Defence in "Environment and Territory"(XIX cycle) at the Department of Sciences and Technologies for the Environment and the Territory, University of Molise

## **Memberships in Scientific Societies**

**2016-present** - Italian Society of Pathology and Translational Medicine (SIPMET)

**2019-present** - European Network for the Study of Adrenal Tumours (ENS@T)

## **Reviewing Activities**

**2020-present** - Topic Board Member, *Microorganism* (MDPI)

Ad hoc referee for the following scientific journals:

- *Frontiers in Medicine* (Frontiers publisher)
- *Investigational New Drugs* (Springer Nature)
- *International Journal of Cancer* (Wiley & sons)
- *BMC Evolutionary Biology* (Springer Nature)

## **Websites database reporting research activity and indexed publications**

**Orcid Id:** <http://orcid.org/0000-0002-8636-2517>

**Scopus Parameters:** H-index: 15, citations: 771; accessed on May 11, 2020)

## **Scientific Achievements**

Since 2009 scientific activity of Dr. Fabio Verginelli has been involved on the study of genetic/epigenetic pathways dysregulated in paragangliomas (Cama et al., 2013), including alterations induced by viral infection. In particular, the discovery of a constitutive HCMV-like virus in paragangliomas led to focus the research on viral particles isolation from tumors and on their characterization, in terms of oncogenic effects. To this end, the development of a protocol based on modified Rous method (1911) coupled with PEG precipitation allowed isolation of HCMV particles from PGL, virus phenotyping by FACS and analysis of the *in vitro* effects induced by infection/superinfection with such particles (ms in preparation, data were presented at international meetings such as SIPMeT 2018, SIPMeT-young 2019 and ENS@T 2019). Furthermore, considering the lack of paraganglioma models, the development of cell and xenograft models has allowed to study the development of HNPGL, the stem markers characterizing the cells initiating tumor and to experiment drugs for preclinical therapies (Florio et al., 2017, Florio et al., 2018, Verginelli et al., 2018, Lotti et al., 2019).

Other achievements in cancer research have been obtained studying the role of environmental factors on tumors etiology such as a) the virulence variability of *H. pylori* strains for gastric cancer (Rocco et al., 2006, Grande et al., 2012, Toracchio et al., 2020); b) the influence of diet on colorectal mutagenesis highlighted by correlation between exposure to nitrosative DNA damage due to foods that promote metabolic stress and chronic inflammation such as meat, milk, sweeteners and animal fats, the energy-dense foods at the basis of "Western" diets and colorectal cancer-associated Tp53 mutation patterns (Bishehsari et al., 2007, Verginelli et al., 2009); c) the interaction between reproductive factors and BRCA1, BRCA2 and p53 genetic background for premenopausal breast cancer onset in Sudanese population (Awadelkarim et al., 2007, Aceto et al., 2019). Achievements in other area than cancer research were obtained by studies carried out in collaboration with the Microbiology Section at CAST headed by Prof. Di Bonaventura. The collaboration allowed to better define the role played by the multidrug efflux pump in the pharmacological resistance by genotyping and phenotyping of bacteria characterized by biofilm production and high virulence such as *Stenotrophomonas maltophilia* and *Pseudomonas aeruginosa* isolated from lungs of cystic fibrosis patients (Pompilio et al., 2011, Pompilio et al., 2015, Pompilio et al., 2016) or *Myroides odoratissimus*, an opportunistic environmental pathogen clinically found in recurrent ulcers of immune-compromised subjects (Pompilio et al., 2017, Pompilio et al., 2018).

Early career achievements are related to investigation of genetic structure variation of human populations through the analysis of mitochondrial genome, Y chromosome haplotypes and autosomal repeated variable sequences (STR) followed by data interpretation using non-parametric statistical analysis and by applying clustering techniques (Destro-Bisol et al., 2004, Destro-Bisol et al., 2004, Tofanelli et al., 2009). Moreover, phylogenetic analysis of ancient mtDNA recovered from prehistoric canids provided support for the involvement of European wolves in the origins of the three major dog clades and supporting multiple independent domestication events (Verginelli et al., 2005, Verginelli et al., 2006).
